SUMMARY

Marine Corps veteran with eight years of operational and instructional experience, now pursuing a B.S. in cognitive science. Possesses a strong background in interpreting real-time data, coordinating complex systems, and communicating clearly under pressure. Utilizing operational discipline to excel in demanding neuroscience and statistics courses. Seeking to leverage reliability and teamwork experience to support research in human cognition.

EDUCATION

Yale University, New Haven, CT

2028

BS in Cognitive Science

Relevant Coursework & Training: NSCI 1600 The Human Brain; S&DS 2300 Data Exploration & Analysis in R; NSCI 2400 Research Methods in Human Neuroscience; fMRI Level 1 Certified

Focus: human brain systems, statistical analysis in R, and clinical neuroscience research methods.

Austin Community College, Austin, TX

2023-2025

Military Awards and Honors: Navy and Marine Corps Commendation Medal (with “C” device), Navy and Marine Corps Achievement Medal.

PROFESSIONAL EXPERIENCE

United States Marine Corps, *Joint Terminal Attack Controller Instructor*, Camp Pendleton, CA

2021-2023

- Designed and delivered 300+ hours of specialized training, including simulated and live-fire events.
- Analyzed real-time variables to provide decision support, mirroring the rapid data interpretation required in cognitive behavioral experiments.
- Oversaw advanced communications systems, gaining technical experience relevant to networking and systems workflows.
- Improved unit readiness through streamlined processes and structured training plans.
- Produced written assessments and after-action reports to document outcomes and training effectiveness.

United States Marine Corps, *Joint Terminal Attack Controller*, Twentynine Palms, Ca

2017-2021

- Analyzed and applied real-time sensor and communication data to support mission objectives.
- Led 23 Marines and managed \$2.3M in weapons and communications equipment.
- Synthesized post-mission datasets to identify trends and implement performance improvement strategies, increasing operational accuracy.
- Coordinated and executed high-risk operations with a focus on safety and accuracy.
- Collaborated across aviation, ground, and support units, ensuring precise communication of complex information.

United States Marine Corps, *Scout Observer*, Twentynine Palms, CA

2014-2017

- Led over 250 hours of partner-force patrols supporting interoperability with NATO forces.
- Delivered 75+ hours of mission briefs and reporting based on collected data and terrain analysis.
- Conducted long-duration surveillance operations requiring sustained attention to detail and the precise logging of environmental and behavioral patterns.

SKILLS

- **Emergency Medical Technician (EMT):** Trained in rapid patient assessment, triage protocols, and physiological monitoring. Possess strong foundation in human anatomy and safety compliance required for human-subject research.
- **Communication & Leadership:** Clear information delivery across teams in high-pressure settings.
- **Data Interpretation & Reporting:** Analyzing real-time sensor data and producing structured documentation.
- **Additional Languages:** Spanish (fluent native speaker), Secret Security Clearance
- **Operational Discipline:** Expert in rigorous adherence to Standard Operating Procedures (SOPs) and safety guidelines in high-stakes environments.
